Bixby Capsule Approval Process

How to get your Bixby Capsule into the Marketplace

Frequent Rejections – Dispatch Names and Dispatch Aliases

Frequent Rejections – Hints and Testing ASR

Frequent Rejections – UI/UX

Dialog – The 6 Don'ts

Don't use default "Here's what I found"

Don't introduce as another voice assistant.

Don't read something else not in the dialog

Don't repeat the dialog in the view

Don't put short dialogs in the view
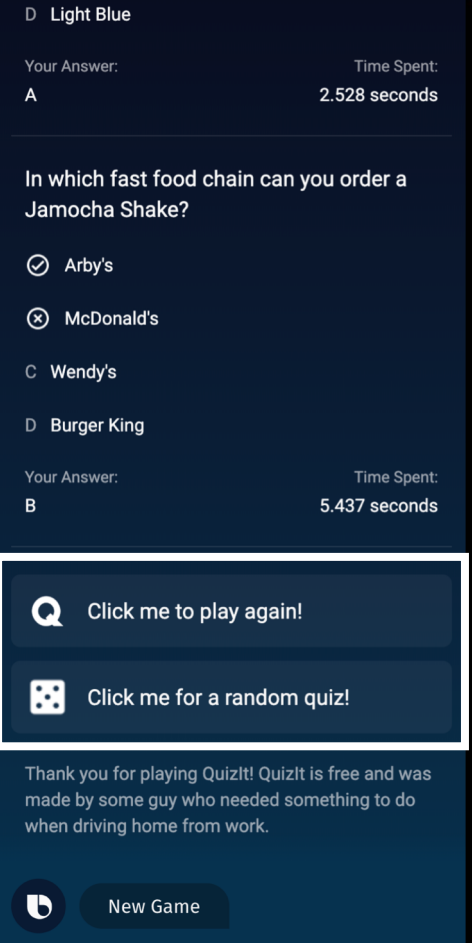

Don't put long dialogs in the dialog

Tappable Components

Tappable components in Bixby have a lightbox around them indicating they can be tapped. Tappable components MUST BE tappable.

Cards like cell-card, image-card, etc are expected to be tappable.

No lightboxes

These are cell-cards which have lightboxes and must be tappable

D   Light Blue

Your Answer:	Time Spent:
A	2.528 seconds

In which fast food chain can you order a Jamocha Shake?

✓ Arby's

✗ McDonald's

C   Wendy's

D   Burger King

Your Answer:	Time Spent:
B	5.437 seconds

Q   Click me to play again!

⚄   Click me for a random quiz!

Thank you for playing QuizIt! QuizIt is free and was made by some guy who needed something to do when driving home from work.

New Game

Punchout Rules

ONLY use attributions-links for simple redirects to a browser.

Punchouts should be used sparingly and only to complete a process that can't be finished in Bixby.

For example, providing insurance quotes is a valid use case for a tappable component to punchout and where an attribution-link wouldn't be advised.

List Views and Input Views

Most List Result Views and Input Views must work with voice

There are some exceptions like CheckBoxes, multi-line forms, etc. However, most input views need to work with voice.

Thank you
